Bio-Booster™ Cetane Improver

Bio-Based Fuel Additive to Improve Diesel Ignitability

Bio-Booster™ is a soy-based, environmentally responsible cetane improver that is readily soluble in diesel fuels. This biosynthetic formula enhances diesel fuel ignitability to improve combustion efficiency in critical applications. EPA-registered and compatible with most diesel fuel additives, Bio-Booster™ supports fuel stability, lubricity, corrosion protection, and water tolerance. It can be blended at terminals, storage tanks, or directly into vehicle fuel tanks to meet or exceed OEM cetane requirements.

Benefits

- Enhances cold weather starting and warm-up times
- Reduces cranking time and engine misfires
- Smoother, quieter operation under severe-duty conditions
- Reduces cylinder pressure rise during combustion
- Improves combustion and emissions in low-duty cycles
- Increases BTU content and fuel economy
- Compatible with Bio-Power™ Summer & Winter Diesel Conditioners
- EPA Registered (EPA Reg. No. 214820003 under 40 CFR 70.23)

Application / New Filling

Suitable for use in:

- Commercial on-road and off-road vehicles
- Diesel passenger cars and trucks
- Stationary engines
- Railway and marine diesel engines

Blend in terminal tanks, underground tanks, or directly into fuel tanks

Specifications and Approvals

- EPA Registration No. 214820003 (40 CFR 70.23)
- Compatible with commonly used diesel fuel additives
- Meets major OEM cetane performance standards
