Bio-Fleet[™] Hydraulic Fluids (AW ISO 22 32, 46, 68)

Bio-Fleet[™] Hydraulic Fluids are readily biodegradable formulas that directly replace zinc and zinc-free petroleum hydraulic fluids. These patented biobased hydraulic fluids are formulated to perform in fleet, marine, and industrial hydraulic systems that require Anti-Wear (AW), anti-rust, anti-oxidation, anti-foam, and demulsibility properties. Bio-Fleet[™] Hydraulic Fluids have a long-term history of proven performance with over 20 years of successfully being used in a wide variety of stationary and mobile hydraulic equipment.

Benefits

- Readily biodegradable, environmentally non-toxic, not bioaccumulative
- Excellent oxidation stability and cold temperature performant
- Improved oxidation stability over straight plant/vegetable oil formulations
- Super high viscosity index provides energy efficiency in equipment
- Direct replacement for petroleum hydraulic fluids
- Environmentally friendly, zinc free formula
- Highly filtered formulation meets or exceeds OEM pump particle count
- Formulated with Stabilized technology increasing VI past synthetic levels
- Great demulsification properties, inhibiting moisture and rust in both fresh and salt water

Application / New Filling

- For construction, forestry, marine, and hydro-electric engineering
- Before changing over to Bio-Fleet, please ask for filling instructions

Specifications and Approvals

- OECD 301B Readily Biodegradable
- ASTM D 5864 Ultimately Biodegradable
- USDA Bio-preferred
- EPA EAL VGP Compliant
- Vickers (20VQ, 35VQ-25(M-2950-S), V-104C (ASTM D-2882), I-286-S)
- Dennison (T-5D)
- US Steel (126, 136, 127)

F.O.B: Hartville, Ohio Availability: 1 Gallon, 5 Gallon Pail, Drum, Totes, Bulk Bio-Fleet Typical Specifications

The test data below shows that the Bio-Fleet[™] Hydraulic Fluids provide high performance in a wide variety of stationary and transportation equipment that operate in broad ranges of environmental conditions. In equipment operating outside, wear from poor cold temperature pumpability, surge loads, moisture, and dusty environments are more prominent. Bio-Fleet[™] Hydraulic Fluids are formulated to improve performance in equipment that requires excellent anti-wear, rapid water separation and cold temperature pumpability as low as -35^oC. They are compatible with the same seals, filters, materials and components that are designed to operate on petroleum oil-based formulations.
